IMPORTANT INFORMATION FOR PARENTS

CAREGIVER BACKGROUND CHECK PROCESS
CALIFORNIA DEPARTMENT OF SOCIAL SERVICES

The California Department of Social Services works to protect the safety of children in child care by licensing child care centers and family child care homes. Our highest priority is to be sure that children are in safe and healthy child care settings. California law requires a background check for any adult who owns, lives in, or works in a licensed child care home or center. Each of these adults must submit fingerprints so that a background check can be done to see if they have any history of crime. If we find that a person has been convicted of a crime other than a minor traffic violation or a marijuana-related offense covered by the marijuana reform legislation codified at Health and Safety Code sections 11361.5 and 11361.7, he/she cannot work or live in the licensed child care home or center unless approved by the Department. This approval is called an exemption.

A person convicted of a crime such as murder, rape, torture, kidnapping, crimes of sexual violence or molestation against children **cannot by law be given an exemption that would allow them to own, live in or work in** a licensed child care home or center. If the crime was a felony or a serious misdemeanor, the person must leave the facility while the request is being reviewed. If the crime is less serious, he/she may be allowed to remain in the licensed child care home or center while the exemption request is being reviewed.

How the Exemption Request is Reviewed

We request information from police departments, the FBI and the courts about the person's record. We consider the type of crime, how many crimes there were, how long ago the crime happened and whether the person has been honest in what they told us.

The person who needs the exemption must provide information about:

- The crime
- What they have done to change their life and obey the law
- Whether they are working, going to school, or receiving training
- Whether they have successfully completed a counseling or rehabilitation program

The person also gives us reference letters from people who aren't related to them who know about their history and their life now.

We look at all these things very carefully in making our decision on exemptions. By law this information cannot be shared with the public.

How to Obtain More Information

As a parent or authorized representative of a child in licensed child care, you have the right to ask the licensed child care home or center whether anyone working or living there has an exemption. If you request this information, and there is a person with an exemption, the child care home or center must tell you the person's name and how he or she is involved with the home or center and give you the name, address, and telephone number of the local licensing office. You may also get the person's name by contacting the local licensing office. You may find the address and phone number on our website. The website address is **http://ccld.ca.gov/contact.htm**

Safe Sleep Policy for Infants

Safe sleep and napping practices reduce the risk of Sudden Infant Death Syndrome (SIDS) and the spread of contagious diseases. SIDS is the unexpected death of a seemingly healthy infant under one year of age for whom no cause of death can be determined.

In order to maintain safe sleep practices, these policies and procedures will be followed:

Infant Sleep Practices and Environment:

1. Healthy infants will always be put to sleep on their backs. Side sleeping is not as safe as back sleeping

2. If a parent/guardian requests that their child be put to sleep in a position other than on their back, or requires a wedge. Parents provide a Physician's signed note that explains how the infant should be put to sleep and the medical reason for this position. This note will be kept in the child's medical file and all staff will be notified of the infant's prescribed sleep position.

3. Infants will be placed to sleep on a firm mattress that fits tightly in a crib that meets Consumer Product Safety Commission safety standards. The sheet will fit the mattress snugly.

4. No toys, stuffed animals, pillows, bumpers, blankets or sleep devices (unless ordered by a health care provider). No teething necklaces or pacifiers with strings.

5. If the infant requires additional warmth, a Sleep Sack can be used.

6. Overheating is one of the risk factors for SIDS; to avoid overheating:

   a. Keep the room at a temperature that is comfortable for a lightly clothed adult, avoid blankets and bedding.

7. The infant's head will remain uncovered when she sleeps.

8. When an infant can easily turn over from back to front and front to back, the infant will be put to sleep on his back but will be allowed to assume his preferred sleep position.

9. Sleeping infants will be visually supervised at all times.

10. Awake infants will have supervised "Tummy Time" to allow for the development of strong back and neck muscles and prevent the development of flat areas on the head.

11. The time infants spend in a car seat, swing will be limited as this can delay motor development and may also cause the infant to develop a flat area on the back of her head. If the child falls asleep in these devices, they must be moved to their crib.

12. Pacifier use has been shown to decrease the risk for SIDS. Infants may be offered a pacifier when they are in the crib if parents offer a pacifier at home. Pacifiers will not be attached by a string or to the infant's clothing. Pacifiers will not be reinserted if they fall out after the infant is asleep.
